

# “FORESTERS” PROGRAM OBJECTIVES

## GRADES 3-7

### STATION 1: INVASIVE SPECIES

At the end of this activity, students will be able to:

- x Recognize the diversity of organisms that make up the forest community.
- x Relate that organisms are found not only in the trees, but also on the ground and in the soil.
- x Know that every different kind of living thing is given a species name.
- x Describe special characteristics or adaptations that helps a species to survive.
- x Define native species, and describe how they function to keep a habitat in balance.
- x Explain that an invasive (i)6 (6 (v)4i)6 (nv)14 (as) .beayi nctsten thn v invnc,inv (v)4in6 (es)14 (

- x Summarize the concept of habitat loss, from knowledge gained through participation in the activity, "Habitat Scramble."
