

ROUNDTABLE: THE FUTURE

ROUNDTABLE: THE FUTURE OF LOUISIANA ENERGY AND THE ENVIRONMENT

ENVIRONMENTAL REGULATORY PICTURE FOR LOUISIANA

OZONE STANDARD REVISION

$\frac{3}{4}$ Expected to be proposed in the November December time frame

$\frac{3}{4}$ October 8th,

	PRIMARY			

HOW WILL THIS NEW STANDARD AFFECT LOUISIANA?

³/₄ Depending upon the final number, the Baton Rouge area along with other currently attainment metro areas will fall into nonattainment status

³/₄ According to a recent NAMS study:

TMA more stringent ozone standard could reduce U.S. GDP by \$270 billion per year and carry a compliance price tag of \$2.2 trillion from 2017 to 2040

TMSetting the standard at 60 ppb could lower LA GSP by \$53 billion through 2040 and lead to 117,000 fewer LA jobs

TMSetting the standard at 60 ppb would require a 63% reduction in Louisiana NOx emissions to comply

TMThe new standards could be the costliest regulations in U.S. history
