

AAPG ASSUMES PTTC MANAGEMENT FOR IMMEDIATE RELEASE

The American Association of Petroleum Geologists and the Petroleum Technology Transfer Council have announced that AAPG has assumed management of PTTC activities effective October 9, 2007.

Since 1994, PTTC, funded primarily by the U.S. Department of Energy with funds matched by the states and industry, has been a re

Green said PTTC's primary tool for transferring E&P technology will continue to be regional workshops, which will be supplemented with a strong Web presence, newsletters and other personal outreach. Using these tools, PTTC will continue to connect producers, the service sector, consultants, researchers and others with the data and technology information needed to spur technology application.

Topics addressed by PTTC activities have covered the full spectrum of E&P operations, including exploration, unconven
