

**ABSTRACT**

In *Law and Policy for the Quantum Age* (Cambridge University Press 2022), Simson Garfinkel and Chris Hoofnagle argue that quantum sensing—not a collapse of cryptography—is the most important near-term implication of quantum technologies. In this talk, Hoofnagle will explain the landscape of quantum technologies, their strategic consequences, and likely scenarios for the quantum age.

**SPEAKER BIO**

Chris Jay Hoofnagle is professor of law in residence at the University of California, Berkeley, School of Law, where he teaches torts, cybersecurity, and programming for lawyers. An elected member of the American Law Institute, Hoofnagle is of counsel to Gunderson Dettmer LLP.
