Objective: The course is designed to provide students with tools necessary for examining politics across the countries of the world. In particular, we will provide a foundation for understanding the concepts on which political systems operate, the forces that account for change and continuity and the basis for comparing political performance in the first, second and third worlds. It is expected that by the end of the semester, students must have developed the analytical skills for explaining the differences and similarities in the select countries discussed in class. POLI 2053 is a General Education course designed to improve broad knowledge, stimulate life-long learning and develop critical understanding of the political phenomena.

The University strives toward Learning Competency and the fulfillment of the following objectives:

- Ability to think, describe, interpret and analyze the world
- Facility to make sense of the world that impacts on our own local system
- The need to gain critical perspectives of the governments and institutions across various political systems
