

GeauxVetLink Portal Information

Version 2 Updated April 2023

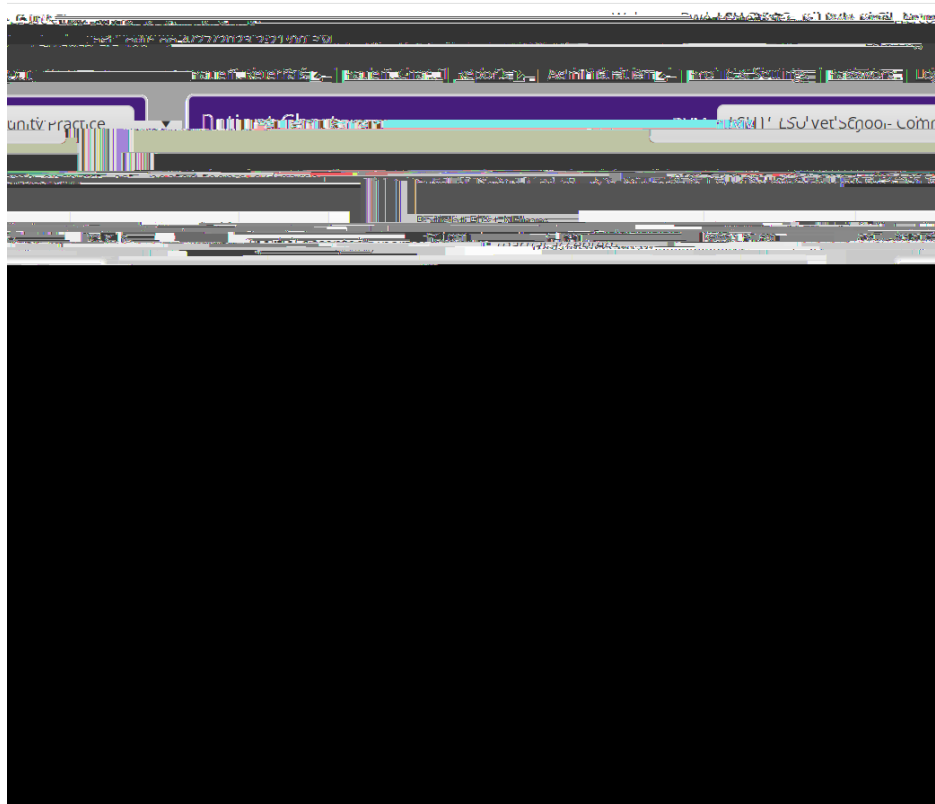

GeauxVetLink is our online portal for veterinarians which provides 24/7 online access to your patient's records through our website. Our system is automatically updated throughout the day, and gives you access to lab results, image reports, medical documents, prescriptions, and more. You can also refer patients directly through the portal. You can choose to receive notifications when a mutual patient checks in, checks out, documents are updated, or a patient passes away. These notifications can come via email, fax, or any combination of the two.

If you need assistance with the portal, don't see a mutual patient, or prefer to not use the portal, our referral coordinator can be reached during normal business hours at 228-9600 option 2 or sareferrals@lsu.edu

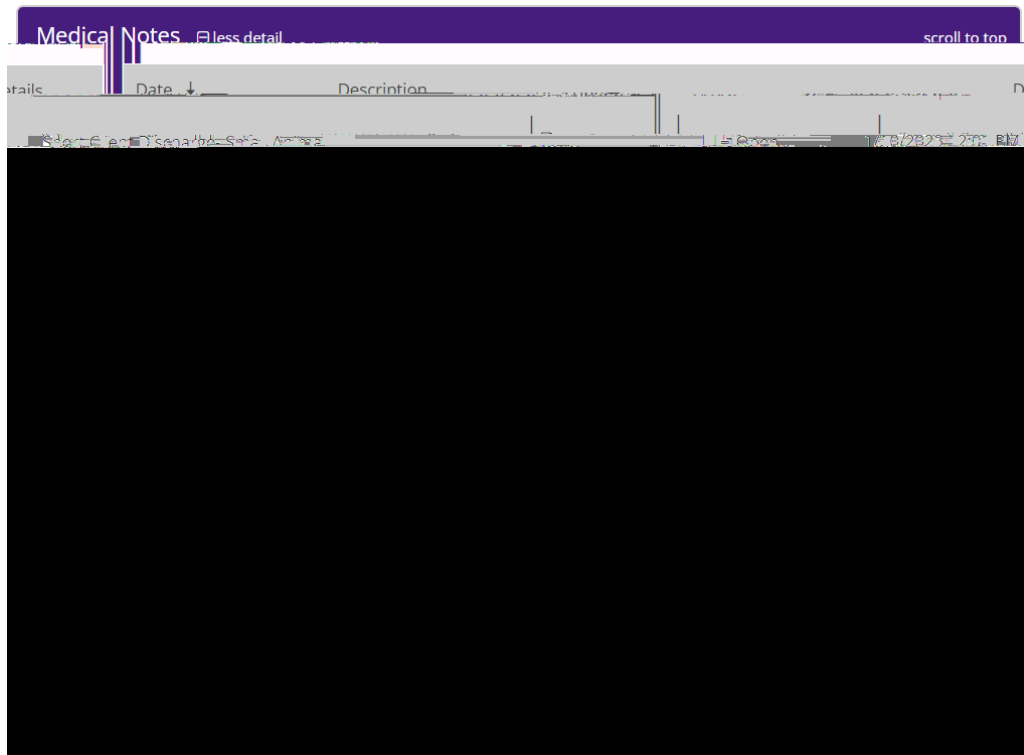

To access the portal:

1. Goto

To view patient records

1. Once you are logged into the portal, it will by default show you any mutual patients you have seen in the last month. You can find additional patients by searching patient first name, client last name, or extend the time frame using the dropdown menu.
2. Once you locate the patient, select "Show" under the details tab on the far right. This will open the available patient information. From here you can scroll through the information. You can also open any attachments:  Open icon.

To refer a patient:

1. Select Refer Patient
2. Begin filling in each field. Next will progress you through each section of the referral form. Required fields are marked with red asterisk
3. You can still email or fax records if you prefer, but the portal also gives you the option to attach them directly to the referral.

Note:
